EDUCATION

2022-2025
DELHI PUBLIC SCHOOL, RANCHI

2025 - Present
NATIONAL INSTITUTE OF TECHNOLOGY, JAMSHEDPUR
B.Tech Mechanical Engineering

UE SKILLS

- Basic UE C++ Class Structures
- Networking and Replication
- Interfaces, Delegates & Comps
- Debugging and Packaging
- Plugins and 3rd Party Libraries

OTHER SKILLS

- Teamwork & Communication
- Fast Learner & Critical Thinking
- Problem Solving

INTERESTS

- Working on Exciting Games
- Learning New Technologies
- Connecting with People
- Engaging with the Community

LANGUAGES

- English (Fluent)
- Hindi (Fluent)
- German (Basics)

PROFILE

I am Rishit Pandit, a student from India, and I am passionate about games and problem solving which lead me to pursue becoming a game programmer. I got into Game Dev before I had done any serious amount of gaming all because of a video on Game Engines that sold them as Physics Engines. Now I find myself working, with a volunteer group of developers, on a game project called Beyond Heroes, for the last 2 years, trying to remake HnG. I am now the UE5 Head and oversee all the game systems along with the Web API and the communication protocols. After spending the last year making a complete production prototype for the game and testing it out over the internet, I have learnt a lot on how not to do things, now we have started working on the main version, and new developers have joined, hopefully making the progress faster.

WORK EXPERIENCE

Beyond Heroes Aug - Apr 2025
Web and Game UI

- Created and Setup the Website for the Project
- Worked on Inventory System UI and functionality
- Implemented and RTS Map and connected it with custom-made REST API using a custom-made UE Plugin
- Worked closely with other Designers and used Version Control

Beyond Heroes Nov 2024 - Apr 2025
UE5 Game Programmer

- Learned C++ for Multiplayer Replicated Code
- Created the Capture Points, Match and Inventory System
- Connected Game Server with custom API for Stats Tracking
- Learned basics of cmake and integrated protobuf to the UE client

Beyond Heroes Mar 2026 - Present
UE5 Head

- Deployed Packaged Builds over the Internet with Steam Subsystem
- Debugged Builds and fixed networking issues
- Structured tasks into a roadmap and modularized systems
- Improved the Web API to handle logins, inventory, progression, etc.
- Leading other devs to develop features with Code Reviews

GAMES PLAYED

Heroes and Generals WWII
Rising Storm 2: Vietnam
Red Orchestra 2
WW1 Game Series
War Thunder
Hell Let Loose
Enlisted
Battlefield 2042
Counter Strike
Fortnite BR
EU4 & Tropico 5
Metalstorm
HITMAN 2016
Dishonored
Metro Series
Saint's Row IV
Wolfenstein TNO
Rage 2
